

KME: Copper Distribution as manufactured by KME

KME manufacture a number of different finishes to copper.

The most common is 'Classic Copper' which has the natural bright, shiny surface finish. This surface, when exposed to the atmosphere, will become dark brown in appearance; this is known as 'Oxid Copper' finish. With further exposure to the atmosphere and over time, the copper will become green; this is known as 'Patina Copper'.

We also stock copper which is coated in tin known as 'Zinn Copper'. This has a shiny silver surface which, when exposed to the atmosphere for a while, will become a matt grey colour.

Product Name	Met-Seam Stock Sizes	Colour Sample
Classic Copper	<ul style="list-style-type: none"> • 400mm wide coil x 100kg x 0.6 • 600mm wide coil x 100kg x 0.6 • 670mm wide coil x 100kg x 0.6 • 1000mm wide coil x 100kg x 0.6 	
Oxid Copper	<ul style="list-style-type: none"> • 600mm wide coil x 100kg x 0.7 	
Zinn Copper	<ul style="list-style-type: none"> • 600mm wide coil x 100kg x 0.7 	
Patina Copper	<ul style="list-style-type: none"> • 670mm x 3.00m x 0.7 sheets • 1000mm x 2.00m x 0.7 sheets • 1000mm x 3.00m x 0.7 sheets
