

## Metals Distribution: Met-Seam Steel and Aluminium

Give your building an attractive exterior without exceeding your budget. Met-Seam offers its Met-Seam 460 system in a wide range of colours.

Due to the strength and durability of steel the Met-Seam 460 profiled panel is the ideal building material for roofs and facades. It can be used on anything from Supermarkets, Civic Buildings, Offices and residential housing.

Met-Seam also offers a complimenting gutter and rainwater system that will match the colour of your roof or facade. The benefits of steel and aluminium are;

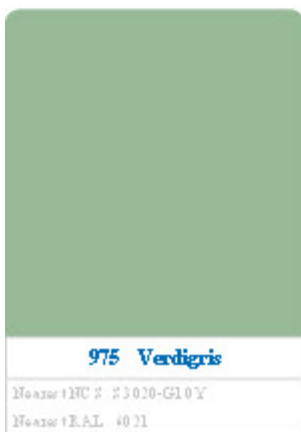

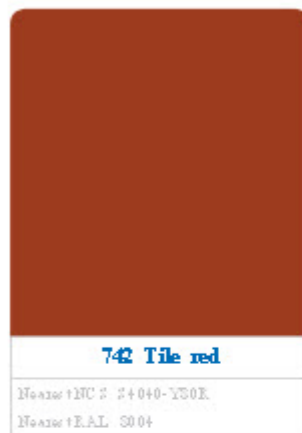

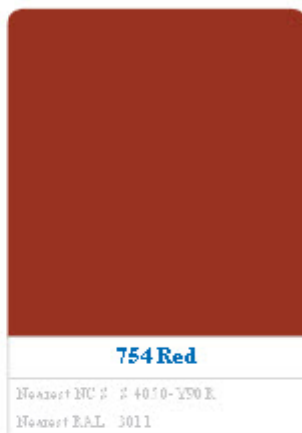

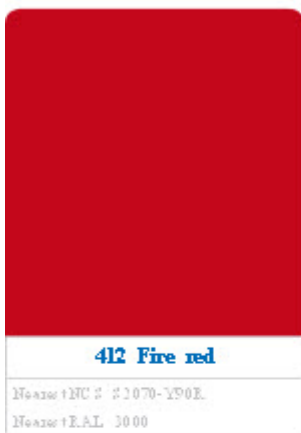

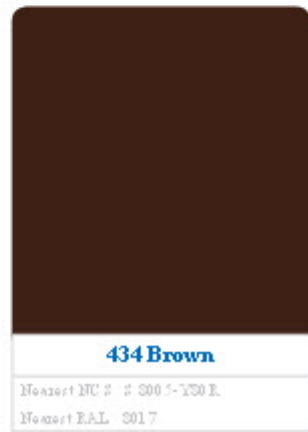

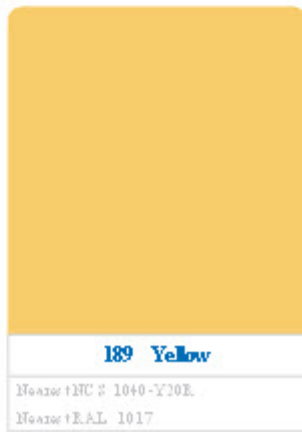

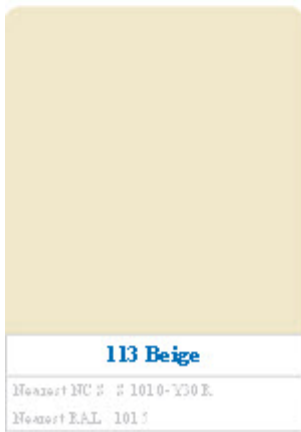

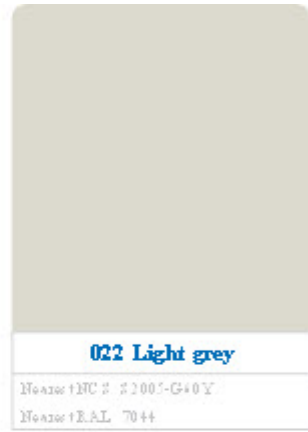

- many colours
- solid and long-lasting
- long life colour retention
- anti-condensation
- durability guaranteed
